NHS treatment

From 1st April 2006 the Government has changed how NHS Dental treatment is paid for.

Patients will pay one of three charges depending on the type of treatment provided.

£16.50 for treatment including Examination and Diagnosis. If **necessary** will include X-rays, scale & polish and planning for further treatment.

£45.60 for all **necessary** treatment as above and /or fillings, root canal treatment or extractions.

£198 for all **necessary** treatment above and /or more complex treatment such as crowns, dentures or bridges.

You will pay one charge even if more than one visit is needed to complete a course of treatment.

£16.50 For urgent and out of hours treatment (further treatment after will be at one of the three bands above)

Some Important Information Relating To Dental Treatment

• **Choosing How To Pay**

After your teeth and mouth have been examined and a treatment plan agreed upon, you will be given an estimate of the cost.

NHS Payments :- Payment in full for the Charge Band appropriate for treatment done so far.

Private payments:- To be paid as each treatment is completed. For laboratory items half in advance and half at fit appointment.

You can pay for your treatment by Cash, Cheque (with a valid cheque guarantee card), Mastercard, VISA, Switch, Delta, or Electron.

We are delighted to offer our Station House Dental Care Plans – our own membership scheme for affordable private dental care. Prices range from £4.05 per month to 16.05 per month. Full details can be found in our Station House Dental Care Plans leaflet.

Please note that the figures quoted are meant as a guide only -- a more accurate estimation can be given after a full clinical examination has been conducted and any x-rays examined by your dentist.
